SAVE YOUR MEAT
There has been a great many pounds of meat spoiled in the past few years caused by the owners not taking the necessary precaution to preserve it. The old smoking process always kept the meat from spoiling and gave it a flavor which added materially to its taste you can get this same flavor and the same results by using WALLACE'S Brand Concentrated Liquid Smoke. This preparation comes in quart bottles, and is applied with a brush to the meat after it is thoroughly cured (either by the dry or pickling process.) Special directions on each bottle. The price is \$1.00 per quart it will smoke a barrel of meat. If your dealer hasn't got it, he will get it for you

GREAT POWER PROJECT
The Virginia Power company is making formal application to the Federal water power commission for privilege of constructing a hydroelectric plant at the junction of the New and Bluestone rivers, about five miles above Hinton.
The project is immense. It means beyond human comprehension in its expansiveness. An expenditure of about thirty million dollars will be required in the immediate development of the site. Even after the first dam is built the total expenditure will have been but partly made. The development will presage the expenditure in the New River valley Hinton and Gauley of not less than a hundred million dollars.
So far as can be ascertained at present, the plan is to construct at the mouth of the Bluestone, a dam which is to be 140 feet in height and 510 feet thick at the base. This mountain of masonry would back up water for 33 miles, all the way to Glen Lynn on the Norfolk and Western railway in Giles county, Virginia. But even then the water power project would be but partly complete, for it would be necessary to construct several additional tributary dams at points farther down the river.
The construction of the additional dams would make New River the power house of the world.—W. Va., News.

The Williams & Pifer Lumber Co. increased its capital stock from \$50,000 to \$100,000.
Born, to Mr. and Mrs. Harry Boggs at Riverside, February 10, a son.

Everything Points the Greatest Spring Demand for Ford Products in Company's History

1,202,517 Ford Cars and Trucks were delivered to retail purchasers in the United States alone during 1922—
Actual deliveries for last month greatly exceeded any previous December in the history of the Ford Motor Company—
It was the ninth consecutive month in which more than 100,000 Ford Cars and Trucks were retailed—keeping the Ford plants working at capacity to meet the dealers' requirements.
In many parts of the country, dealers are already finding it necessary to specify later delivery dates on certain types because there are no reserve stocks to draw from.

Commercial users, business houses and farmers, anticipating their future requirements, are placing orders and taking delivery of Ford Cars, Trucks and Fordson Tractors to insure against delay.
Everything points to the biggest shortage of Ford Products this spring that has ever existed.
The only way you can be sure of obtaining delivery of a Ford Car, Truck or Fordson Tractor is to list your order immediately.

We have given you these facts as they actually exist so that if you are planning to purchase a Ford Car, Truck or Tractor for use this spring or summer, you can list your order now and take advantage of our dealers' first opportunity to make delivery.
